A young boy with light brown hair, wearing a white lab coat over a blue shirt and tie, and safety goggles, is pouring a yellow liquid from a beaker into a test tube. The background is a soft, out-of-focus rainbow.

We have the honor to invite you to attend ***The 3rd Edition of Round Table of PLAY and SCIENTIFIC RESEARCH*** organized by INC DIE ICPE-CA Bucharest together with the International Theoretical High School of Informatics Bucharest, National College of Informatics “Tudor Vianu”, National Bilingual College “George Coşbuc” Bucharest and Radio Romania Cultural as a mass-media partner, with the support of the Ministry of Research and Innovation.

The main objective of this event is to highlight the role of the play in scientific research as a vector of creativity and innovation (to distinguish between play and entertainment).

The papers will address topics from areas where play as a support of creativity represents case studies.
