## LOCATION

**Constanta** is in a region of Romania called Dobrogea, which is the land between the Danube River to the west and Black Sea to the east. The history of the city goes back to 657 BC when it was the Greek controlled town of Tomis. When Romania became a Province of the Roman Empire in 106 AD the Romans later renamed the city after emperor Constantine who fortified and developed the city from 320 - 350AD. The city was later destroyed in the 8th century by invading Slavs and Avars and then fell under Byzantine control. In 1418 the Turks had there turn at the region until the mid 1800s when the national state of Romania was created in 1862. Constanta was taken by Romania in 1877 after the of Independence.

The Port of Constanta is the main Romanian port and the largest port in the Black Sea. It has a geostrategical position being located on the route of two Pan-European Transport Corridors: river Corridor VII (Danube) and rail-road Corridor IV. In the southern part of Constanta Port there is a river-maritime sector, which allows the accommodation of maritime vessels and river vessels as well. The two satellite ports, Midia and Mangalia, are located close to the port of Constanta and perform a vital function in the overall port framework.
